C PREVAILING CONDITIONS

Wind: 12 to 25 knots; Air temperature: 18°C to 22 °C; Water temperature: 20°C

Wind

Over the course of November typical wind speeds vary from 1 m/s to 9 m/s (light air to fresh breeze), rarely exceeding 15 m/s (high wind).

The *highest* average wind speed of 6 m/s (moderate breeze) occurs around November 9, at which time the average daily maximum wind speed is 9 m/s (fresh breeze).

The *lowest* average wind speed of 5 m/s (gentle breeze) occurs around November 30, at which time the average daily maximum wind speed is 8 m/s (fresh breeze).

Wind Speed in November

The average daily minimum (red), maximum (green), and average (black) wind speed with percentile bands (inner band from 25th to 75th percentile, outer band from 10th to 90th percentile).

The wind is most often out of the north west (16% of the time), north (14% of the time), south (13% of the time), east (10% of the time), and south east (10% of the time).

Wind Directions in November

The fraction of time spent with the wind blowing from the various directions over the entire year. Values do not sum to 100% because the wind direction is undefined when the wind speed is zero.

Below is a graph of Historical Sea Surface Temperature for Terceira - Praia Vitoria. This has been derived from analysis of two decades of oceanographic satellite measurements of nearby open water. We have calculated the average water temperature variation around the year as well as the extremes that have been observed on each date.

All of the graphs for the surf breaks presented on Surf-Forecast.com are on the same scale to enable comparison between locations around the world.
